Accomplished software engineer with 4 years of work experience, driven by a passion for problem-solving and a deep alignment with organizational objectives. My commitment lies in cultivating maintainable codebases and user-centric solutions.

Bringing extensive expertise as both a frontend and full-stack engineer in crafting multiple client-focused web applications, I am recognized for high level of responsibility, meticulousness, and organizational acumen within previous teams. I firmly believe that effective communication is the key to delivering exceptional products.

Relocating to the UK in May with full work authorization, I am actively seeking roles across the country.

Skills

- Languages: Typescript/Javascript, Node.js, HTML/CSS, Java, SQL
- Technologies: Vue.js/Nuxt.js, Nest.js, GraphQL, ORMs, Angular, React/Next.js, SCSS, Tailwind, Jest
- Other: API design, Relational Databases, Docker, Git, Agile/Scrum, Jira, Time Management, Communication

Professional Experience

ONDA (Travel Tech Startup, +100 Employees), Seoul, South Korea

Full-Stack Software Engineer   **2022 – 2023**

- Led a project building an admin web app end-to-end using Vue3 and Nest.js, improving the account managing process and increasing the number of accounts by >1000 post-launch.
- Improved consistency and maintainability of the entire codebase by initiating, defining, and applying coding convention and ESLint rules for Vuejs projects across the company.
- Reduced code complexity and repetitions of a legacy project built with Vue.js by refactoring structures and encapsulating shared features in composable functions and components.
- Mentored and pair-coded with less-experienced developers to help with onboarding.
- Enhanced in-house operation performance by designing and developing backend APIs for the back-office using Nest.js that combined and modularized admin features of distributed service domains.
- Fulfilled privacy compliance by implementing authentication using JWT Passport, session control through a refresh token, and role-based authorization.

Junior Frontend Engineer   **2019 – 2021**

- Built a complete responsive hotel booking website using Nuxt.js with SSR including implementation of end-to-end booking process; selected as google hotel partner product.
- Published custom user-oriented visuals and features in a structured and maintainable way by adapting BEM methodology with SASS in collaboration with web designers.
- Migrated data for a new pricing system by creating SQL procedures; monitored and tracked down data inconsistency, preventing the company loss.

Education

Java Web Developer Bootcamp, KH Academy, Seoul, South Korea   **2019**
B.S.E. Aerospace Engineering, Inha University, Incheon, South Korea   **2012 - 2014**
